peech ernment should grant a sufficient quest subsidy to cover the additional expense. That does not, however, break the force of the argument for a less expensive form. In any event the Territories are entitled to a certain amount of money from the Dominion exchequer, but why should it cost the greater portion of it to spend the remainder and the people be taxed to pay the difference in the cost of the two forms? The responsibility to the people is the same in both cases. Their control over their own administrative affairs is as direct in the one instance as the other. The discussions and recomendations of the Council on this question will be watched with much interest by the people.

> The much-electioneered people of Haldimand, Ont., have this time decided in favor of the Conservative candidate, Mr. Montague being elected on Saturday last by a majority of seventeen over Mr. Colter. This is the second seat gained by the Government from the Opnosi. tive candidate, Mr. Montague being the Government from the Opposition since February last.

An Accomplished Parrot.

Around the door of a Sixth avenue bird store near Twenty-third street, was gathered the other day a crowd so large that it was a work of several minutes to gain entrance to the interior. From within there proceeded a hourse ky, which bellowed in Irish-American brogue the enlivening strains of "Peeka-a-boo." With each reiteration of "Peeka-a-boo." With each reiteration of "Peeka-a-boo." It was not seen that the second of the crowd hallooed with delight, and one small boy in the exuberance of his joy tied himself into a sort of knot, and roiled on the parement to a dead stop, and another voice, pleasanter in quality, sang the inspiring national ode of "Yankee Doodle," followed by the stentorian query and answer all in one. "How are the Fai Upsilon boys? On, they real lirgist!" A passer-by, puzzled at the scene, made his way into the store and soon made his way into the store and soon and yellow parrot, which was hanging by one foot to a swinging perch, and trolling forth in different voices with the case of an accomplished ventrologuet. He resumed a normal position as he was approached, and, Japping his head on one side, he dropped into a more conversational tone, and with a regular "Alice in Wonderland" air remarked: "Us never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to mend a bird in the hand," and again, after a pause, "It's never too late to men

"You're quite an accomplished bird, "You're quite an accomplished bird, "You're quite an accomplished bird, replied."
"I can spell, tann. Ca-t, cat. B-O-g, fox." with an affectation of juvenility which was gressome. He resented an ill-advised attempt at familiarity by snapping at the finger which tried to scratch his poil and barked out:
"Take eare. I'm a bad bird, I am. You betcher life." A bound of the same time." yaid his owner, Mr. Holden. "In fact, he is almost as good as Ben Butler, whou I sold to Patit. His stock of proverbs seems ineshaustifie, and he makes them quite funny by the ingenious way in which he mixes them up. #### The Planchette.

There are some undications that the mysterious little planchette beard, like roller skating, is coming into fashion again. No adequate explanation of it has ever been received, though many have been offered. The construction is as you see, a plain, heart shaped cedar board fixed upon two metal legs, to which are adjected wheels that move the property of the construction is as you see, a plain, heart shaped cedar board fixed upon two metal legs, to which are adjected wheels that move the property of the construction is a plain, heart shaped cedar board fixed upon two metal legs, to which are adjected to hold an ordinary pencil firmly. That is all there is of it.

Put a pencil at the point, as you see, put two hands upon the board, as you also see. After keeping the hands lightly and quietly in their places a few minutes, planchette will often begin and the statement of the planchette will often begin ward of a summer of the planchette will often begin ward no, and someless gabble of one sort or another, to which no importance must be attached.
